

VDU Services

FULL VDU FRAMES FOR €105

Get single-vision VDU glasses, including recommended Blue Control filters for just €105

(€75 without Blue Control)

Saving employers up to €110!

With digital screen use much more frequent due to smart phones and new work-from-home initiatives, cases of Digital Eye Strain (DES) are on the rise.

Digital Eye-Strain is caused by:

- Screen glare
- Poor lighting
- Poor posture while using a computer
- Viewing a computer at the wrong distance/angle
- Uncorrected vision problems

Digital eye-strain can lead to blurred or double vision, headaches, dry eye and increased absences from work.

With so many people now working from home or from work environments that have not been optimized, there has been an increase in demand for VDU frames.

One of the most effective ways of reducing DES is by wearing glasses with a screen glare filter – otherwise known as a “Blue Control” filter which can come as part of a pair of VDU frames.

Crowleys Opticians provide a full VDU service for individuals and organizations. We will test your eyes, detect digital eye-strain, prescribe a solution and make and supply the frames which will alleviate the problem.
