

# VDU Services

## **FULL VDU FRAMES FOR €180**

Get single-vision VDU frames, lenses including recommended Blue Control filters for just €180!

*Saving employers up to €60 per pair!*

*With digital screen use much more frequent due to smart phones and new work-from-home initiatives, cases of Digital Eye Strain (DES) are on the rise.*

Digital Eye-Strain is caused by:

- Screen glare
- Poor lighting
- Poor posture while using a computer
- Viewing a computer at the wrong distance/angle
- Uncorrected vision problems

*Digital eye-strain can lead to blurred or double vision, headaches, dry eye and increased absences from work.*

With so many people now working from home or from work environments that have not been optimized, there has been an increase in demand for VDU frames.

**One of the most effective ways of reducing DES is by wearing glasses with a screen glare filter – otherwise known as a “Blue Control” filter which can come as part of a pair of VDU frames.**

Crowleys Opticians provide a full VDU service for individuals and organizations. We will test your eyes, detect digital eye-strain, prescribe a solution and make and supply the frames which will alleviate the problem.

## **Our Corporate VDU Offer**

To support employers and teams, we offer a one-stop-shop. We'll take care of your eyes and custom-make your VDU glasses using fashionable high-street frames and the highest quality lenses.

### **Frame range**

Choose anything from our €149 or less range – a wide, vibrant variety.

### **Lenses**

We use only Optical Quality lenses – not plastic – and add Blue Control filters to reduce harmful blue light!

### **Quality and speed**

Using our in-store labs, we'll build your VDU glasses and have them with you in less than 10 days.

### **Easy process**

We work with organizations to create a smooth and seamless process.
